

No. 32

VEGETARIAN November 21, 1955

MR. COUNTY AGENT:

As stated in Extension Circular 140, "Some Questions and Answers on Vegetable Pesticide Tolerances", no doubt other information is and will become available. So...

We'll summarize several of the pertinent changes since July 22, and in such a manner that you can bring up-to-date the chart in 140.... "A Summary of Florida Vegetable Pesticide Tolerances":

FIRST - The effective date has been extended by crops to January 22, 1956, on a number of chemicals of interest to you (Federal Register No. 212, October 29, 1955); we show them below ("x") so you can transfer appropriate entries to your reference copy of the chart.

	<u>Aldrin</u>	<u>Endrin</u>	<u>Chlor- dane</u>	<u>Diel- drin</u>	<u>EPN</u>	<u>Methoxy- chlor</u>	<u>Toxa- phene</u>	<u>Di- chlone</u>	<u>Ziram</u>
Beans	x			x					
English pea									
Southern pea	x			x		"cowpeas"	"cowpeas"		
Beet							x		
Carrot	x					x			
Corn	x			x					
Crucifers:									
Broccoli	x								
Cabbage	x	x		x					
Cauliflower									
Greens:									
Collard (Kale)							x		
Mustard							x		
Turnip							x		
(Spinach)							x		
Cucurbits:									
Cantaloupe				x					
Cucumber	x			x					
Squash									
Watermelon									"melons"
Okra									
Onion	x				x				
Potatoes:									
Irish				x					
Sweet			x	x					
Radish									
Salad:									
Celery								x	
Endive (Escarole)									
Lettuce				x					
Solanaceous:									
Eggplant									
Pepper							x		
Tomato	x				x			x	
Strawberry	x			x					x

As a matter of interest, a January 22, 1956 extension was granted for captan for post-harvest use on potatoes (Federal Register No. 217, November 5, 1955).

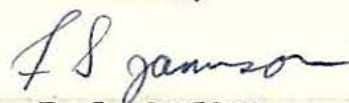

SECOND - Tolerances have been established by crop on a number of chemicals; again, we've attempted to single out ("x") those of particular interest and arrange them so you can correct your reference copy:

Malathion: 8.0 ppm Systox: 0.75 ppm Captan: 20.0 ppm Maneb: 7.0 ppm*
 FR #205, Oct. 20 FR #172, Sept. 2 FR # 147, July 29 FR #205, Oct. 20

Beans	x			x
English pea	"peas"			
Southern pea	"peas"			
Beet	x			
Carrot				x
Corn				
<u>Crucifers:</u>				
Broccoli	x	x		
Cabbage	x	x		
Cauliflower	x	x		
<u>Greens:</u>				
Collard (Kale)	kale			
Mustard	x			
Turnip	x			
(Spinach)	x			x
<u>Cucurbits:</u>				
Cantaloupe	"melons"	x	x	"melons"
Cucumber	x		x	x
Squash	x		x	x
Watermelon	"melons"		x	"melons"
Okra				
Onion	x			x
<u>Potatoes:</u>				
Irish	x	x		0.1 ppm*
Sweet				
Radish				
<u>Salad:</u>				
Celery	x			x
Endive (Escarole)				
Lettuce	x			
<u>Solanaceous:</u>				
Eggplant	x		x	x
Pepper	x		x	x
Tomato	x		x	x
Strawberry	x	x	x	

THIRD - We have not attempted to include all changes just a version of those appearing most pertinent after a check of Federal Registers through November 15th.

Sincerely,

F. S. JAMISON
 Vegetable Crop Specialist
